The Raab Multidisciplinary Cancer Symposium

Welcome to the second annual Raab Multidisciplinary Cancer Symposium, named in honor of the founding members of the division of hematology and oncology at East Carolina University, Drs. Mary and Spencer Raab. The purpose of this symposium is to bring nationally recognized disease site experts face to face with physicians, physician extenders, nurses and learners from our region to inform, enlighten and provoke discussion on how to best manage solid tumors.

This year’s symposium focus is pancreatic cancer, the third most deadly and sixth most common cancer in eastern North Carolina. The program encompasses the latest evidence-based data in prevention, diagnosis and treatment. Our keynote speaker, Dr. Keith Lillemoe is an expert in the diagnosis and management of premalignant/cystic pancreatic lesions. His presentation is bookended by Dr. Kara Regan, who will explain how to best obtain tissue for diagnosis and Dr. Aatur Singhi who will explain how to use that tissue to arrive at a diagnosis using the most up to date molecular and pathologic techniques. Drs. Stan Branch and Alex Rosemurgy will round out the program sharing the latest in robotic and endoscopic interventions for resection and palliation. Finally, we will address recent exciting developments in chemotherapy and immunotherapy for locally advanced, metastatic and resectable pancreatic cancer in the context of TNT and modified FOLFIRINOX regimens. The symposium will close with a panel discussion and interesting case presentations hosted by our local experts Alex Parikh, Mahvish Muzaffar and Prashant Mudireddy. We look forward to another successful program and welcome you back to Greenville and Eastern AHEC for what promises to be a great program.

Target Audience

This conference has been planned for Oncologists, Pathologists, Surgeons, Internal Medicine and Primary Care Providers, Nurse Practitioners, Physician Assistants, Nurses, Pharmacists, Pharmacy Technicians and other health care providers involved in the care of pancreatic cancer patients.
